Scott Huckestein
BIOGRAPHY

An entrepreneurial chocolatier and USA inter-industry innovator for over twenty years is going global! Scott Huckestein is now the Founder of S.H. World Chocolate Inc. In his role as Chairman / CEO, he is a highly respected chocolatier who has created a unique A to Z vertically integrated chocolate company in the USA. Scott's aspirations are to take American knowhow into global markets, just as he has helped hundreds of small and large chocolatiers realize their entrepreneurial dreams at home in the USA.

Scott's journey in chocolate began upon meeting his mentor, Baruch Schaked, the co-founder of Schokolad, who began his career as a chocolatier in Argentina while working for his father-in-law, Gustavo Bar, the owner of one of South America's largest chocolate factories. Baruch had the vision of developing retail stores in the U.S. and abroad.

Intrigued with the science behind chocolate manufacturing, Scott left his position as an aircraft technician with Northwest Airlines and opened a Schokolad Chocolate Factory retail in Ann Arbor, MI under Chocolate Dreams Inc. Through his background in aerospace technology, he brought innovation to the manufacturing process with his patent-pending application of aircraft sensors to chocolate processing equipment, among many other innovations.

Over ten years, Scott owned the Ann Arbor location and, in partnership, was the brand franchise developer, creating 31 store locations with two international stores. He was President of the Franchise Advisory Committee and President of the Marketing Committee in communication with all franchisees. Scott had the highest sales position in the ten years following the company's inception.

During the growth of the company, Scott promoted the importance of creating multiple income streams for the franchisees, i.e., retail, corporate gifts, custom chocolate, private label, and wholesale. Marketing the importance of the high antioxidant content of dark chocolate, he ultimately achieved 70 percent of his sales in dark chocolate and he began to introduce chocolate and wine tastings in collaboration with many local wineries and restaurants. In the early 2000's, Scott helped a brewery create a chocolate wheat beer using his chocolate recipe that beat Samuel Adams in a taste test. He established relationships and collaborated with many charities to create custom chocolates that provide added value to fundraising.

After being presented with an opportunity from the company's chocolate custom mold supplier and equipment manufacturer to purchase the manufacturing company, Scott sold Chocolate Dreams, Inc. and co-founded Chocolate Creations, Inc. with Dr. Roger Newton, the co-developer of Lipitor, to buy assets of the supplier. The creation of Chocolate Creations, Inc. enabled multiple divisions to integrate vertically, adding value to the consumer and realizing its mission to create the healthiest chocolate on the planet through research and development. The divisions of Chocolate Creations, Inc. encompassed chocolate equipment manufacturing, custom chocolate mold manufacturing, retail, private label and co-manufacturing, wholesale, research, and factory development for "bean to bar" chocolate formulation. Scott formulated organic dark chocolate with cherry cluster non-GMO, sampling 15,000 individuals with very positive taste results. He created a "better together" atmosphere, collaborating with ingredient suppliers and larger corporations to add value to products using many formulations that gave healthy dark chocolate options to the consumer.

For over two decades, Scott Huckestein has provided formulations of healthy dark chocolate and custom chocolate designs for multiple corporations and Fortune 500 companies including Disney, Toyota, Ritz Carlton, the NFL, the Superbowl and the Pro Football Hall of Fame.

With a vision of developing offerings and capabilities that meet and exceed global customer taste, while realizing his dream of using chocolate -- the "food of the gods", to deliver health to humanity, Scott founded S.H. World Chocolate Inc., in association with Co-founder and Executive Chairman Jack Craciun III, ITM Chairman/CEO and Founder of The Future of Medicine Foundation™, Ltd. S.H. World Chocolate Inc. is a vertically integrated company that will provide international distribution of healthy chocolate and build capacity to grow revenue in manufacturing. S.H. World Chocolate Inc. will introduce master territorial licenses incorporating all the company's divisions, generating a revenue stream for each division, and creating company asset mergers with brands including [Frosted Frootes](#) of the UK and South Africa, established by longtime ITM Associates, Geoffrey Bond and Mark DeJohn who have invited Jack Craciun III, to become a member of the Board of Directors and a Consultant / Advisor of Frosted Frootes Holdings Ltd. Other merger opportunities include [Smartlife Chocolate](#), [Vino Cocoa](#), and [Timeless Treasures Candy Company](#).

Most importantly, global profits from the use of the S.H. World Chocolate Inc.'s Share Bar™ Chocolate intellectual property will generate proceeds exclusively for three non-profit entities dedicated to returning health to humanity by protecting our rights to nutrition: [The Future of Medicine Foundation™](#), the [National Health Federation](#) and the [Foundation for Health Research](#).

The Future of Medicine Foundation™'s mission is to fund clinical trials and obtain the validating scientific data that proves the disease prevention and lifesaving attributes of nutrition based Orthomolecular Medicine and to develop a global advocacy led by business leaders and consumers that leads to the merging of nutrition-based Orthomolecular and Integrative Medicine more fully into mainstream medicine.

[The National Health Federation](#) is the most powerful, most influential advocate for health freedom policies which directly affect the lives of 7 billion people worldwide. NHF is the world's oldest and most respected consumer health freedom organization and the only INGO (International Non-Governmental Organization) recognized to speak, submit scientific research, and actively shape global policy at international meetings of the [Codex Alimentarius Commission](#). Codex is the global seat of power established by the United Nations that sets international standards, guidelines and codes of practice for agriculture, food, beverages, and nutritional supplements. NHF President, Scott Tips, J.D., has attended more Codex meetings worldwide as chief delegate for NHF than all other health-freedom activists combined.

The [Foundation for Health Research](#) (FHR), sister organization to the NHF, is a 501(c)(3) organization dedicated to research and education regarding health freedom with an emphasis on holistic healthcare and nutrition. Since 1982, the Foundation for Health Research (FHR) has served both the public and policymakers as an information portal on natural health and health freedom through the preservation of health-freedom history and maintenance of the [NHF Memorial Library](#), the only health-freedom library of its kind in the world. The alliance between FHR and NHF is integral in the fight for individual liberty and the right to achieve, protect and preserve optimal health for all humanity.
